INDEX

S.no.	Experiment	Date	Sign
1.	Sorting Algorithms a) Merge Sort in descending order b) Quick Sort in ascending order c) Heap Sort in descending order	20/08/26	
2.	Graph Algorithms using DFS a) Connected Components of an undirected graph b) Cut Vertices (Articulation Points) c) Cycle detection in an undirected graph	27/08/26	
3.	Greedy Algorithms a) Fractional Knapsack b) Activity Selection c) Maximum number of events that can be attended	10/09/26	
4.	a) Minimum Spanning Tree using Prim's and Kruskal's Algorithm b) Single Source Shortest Path using Dijkstra's Algorithm	24/09/26	
5.	a) Single Source Shortest Path using Bellman-Ford Algorithm b) Huffman Coding for Data Compression	01/10/26	
6.	Dynamic Programming a) Matrix Chain Multiplication b) Longest Common Subsequence	08/10/26	
7.	0/1 Knapsack Problem using Dynamic Programming	15/10/26	
8.	N-Queens problem using the Backtracking technique.	22/10/26	
9.	Edit Distance (Levenshtein Distance) between two given strings using Dynamic Programming.	29/10/26	
10.	Longest Increasing Subsequence (LIS) of a given array using Dynamic Programming.	05/11/26
